

# The Clipping File

The SMC GS Clipping file is a small, but growing, collection of articles about San Mateo County residents, and some special topics. The clippings have been digitized and are available from SMC GS. The index gives the number of pages for each entry.

In addition to the clippings there are hundreds of entries for people and subjects that George Zinckgraf indexed from the in the local history columns Faces of the 20<sup>th</sup> Century, Other Times and Time and Again. Those columns are available in binders in the SMC GS library.
